

TRINTECH: CERTIFICATION FOR RECONCILIATION THE BUSINESS CASE FOR AUTOMATION

YOUR CHALLENGE:

Compiling financial data, manually reconciling it and making sure that the process is done in an accurate and timely manner is a difficult undertaking, especially for companies using manual spreadsheets to manage their reconciliation process.

OUR RESEARCH:

Research consisting of in-depth interviews with Cadency users found that Cadency has a proven track record of addressing numerous common reconciliation challenges experienced by financial professionals working for global organizations across several different industries.

OPERATIONAL INEFFICIENCIES

LACK OF VISIBILITY

FINANCIAL STATEMENT RISK

“We needed increased transparency and to manage risk on the balance sheet through reporting on reconciling items and identifying where the risk was.”

- Director and Corporate Controller, Global Manufacturing Company

IMPROVE OPERATIONAL EFFICIENCIES

Automating the day-to-day operations of the reconciliation process allows employees to spend less time on processing the data and more on what it means to you as a company.
